

Transportation Department Routing proposal/analysis

Staff felt it was time to review our 3 tier busing system. The 3 tier system has been in operation since 1994. The many changes and addition of schools warrant a review of this system. While conducting the review we had 3 major goals in mind:

- 1) Improved efficiency. Our current efficiency rating with the DPI is 99.49%. Per discussion with DPI, our efficiency rating next year would be 93.43% if everything remained the same. The rate would continue to decrease below the 93.43% if we add additional buses and our riders remained relatively the same.
- 2) Improved customer service. Buses are on a very tight schedule between tiers today and we arrive late to some schools on a consistent basis in the afternoon. Over the years the increased traffic and number of motorists in Wake County has made it more difficult to transport students timely with the limited time between tiers. We are confident buses would be on campus when the bell rings in the afternoon with the new tier system.
- 3) Support of the new choice assignment plan. We feel the additional time between tiers will allow buses to extend runs slightly to absorb new stops without the need to add buses to cover those stops. Student ride times should not be adversely impacted to any significant extent.

The analysis was based on the 2011-12 student assignments. The current board policy for student ride times was used for the analysis.

We conducted meetings with each Operations Manager across our 15 transportation districts. The purpose of these meetings was to review the district's current routing and bell schedule coordination for maximum efficiency and customer service.

The changing or tweaking of bell schedules across the district netted a 112 bus savings projection.

Transportation Routing Analysis

Plan benefits

- 1) Increased Efficiency
- 2) Improved Customer Service
- 3) Flexibility to accommodate choices

Assumptions:

- 1) based on current assignments
- 2) current policy on student ride times

Transportation Routing Analysis-Cost Savings

	<u>2011-12</u>	<u>Without New Routing 2012-13</u>	<u>With New Routing 2012-13</u>	<u>2012-13 Comparison Increase/(Decrease)</u>
Number of buses	933	985	873	-112
Efficiency Rating(50 buses=2%)	99.49%	91.00%	99.00%	8.00%
State Revenue (estimated)	\$50,000,205	\$45,954,741	\$49,994,718	\$4,039,977
REVENUE LOSS PREVENTION				\$4,039,977
OPERATING COST AVOIDANCE		add 52 drivers/buses	reduce 60 drivers/buses	
Driver costs		\$1,208,896	-\$1,394,880	-\$2,603,776
Fuel costs		\$472,680	-\$545,400	-\$1,018,080
Maintenance costs		\$121,784	-\$140,520	-\$262,304
CAPTIAL COST AVOIDANCE				
Capital costs (52 buses minus 25 DPI loaner buses)		\$2,430,000	\$0	-\$2,430,000
TOTAL COST AVOIDANCE				-\$6,314,160
SERVICE IMPACTS				
afternoon 30 minute on-time window	Yes	Yes	No	Service Improvement
Ride Times		Remain the same	Structure may result in shorter ride times	Hopeful for improvement
Accommodate Choice Plan		up to 25 additional buses	Possibly less than 25 additonal buses	Less Buses
